

My name is Jill Conner Roberts. I was diagnosed with Cystic Fibrosis when I was 3 years old. I spent most of my school years in and out of the hospital but still graduated and attend the University of Missouri. While I was in college, I became very sick and had to undergo a double lung transplant. The transplant was a miracle and 10 years later, I am doing great. Thank you to all who contribute to finding a cure for Cystic Fibrosis. At 33 years of age, it's a miracle that I am alive and it's thanks to people like you.
